Date: 10 Oct. 2012 (Wed)

Time: 7:00pm- 9:30pm

Venue: Box Hill Town Hall 1022 Whitehorse Rd, Box Hill VIC Tel:9262- 6243

Fee: Free (Booking is essential at <http://www.neuromuscular-rehabilitation.com/>)

This event is planned by Mrs Mahony, a patient of spinal cord injury, and her family, and Reiko & Toshi Furukawa. She and her husband researched whole Australia to get a chance to recover. However, they had to wait for three years until her husband found a stem cell therapy hospital in Mumbai. In 2011 they went to the hospital and had an operation and continued rehabilitation. Now she can move even though a long way to recover. She and her husband had never given up and kept a hope. She wants to share her story and help other people who have no hope for recovering by current medical system, and leave staying in bed, or in wheel chair. They might be sports players who had an injury from playing sports, skilled workers who had an accident at their workplaces, soldiers who were injured during peace keeping work, or children who had an accident or incurable disease. They don't have to endure in their future, especially young people. Although she is 64 y/o and she had been staying in wheel chair for 3 years without effective rehabilitation, she is recovering constantly after the stem cell therapy. We are sure that young people can recover more quickly and effectively.

Mrs Mahony also believes that the stem cell therapy gives great hope for incurable diseases, Muscular dystrophy, Multiple Sclerosis, Brain stroke, Cerebral Palsy, Dementia, Autism, Alzheimer, Parkinson disease, Diabetes, Leukemia and a lot more. Also everyone would be surprised that she had no side effect.

Before stem cell therapy

Marie was evaluated in Austin Hospital on sep.2009

After stem cell therapy

Marie tries to write her name on March 24th, 2012.

Program (It might be changed without notice.)
